

## **Annotation**

### **of the dissertation of Khojibaeva Mukaddas Abduganievna on the topic: «Peculiarities of the functioning of the territorial consumer market in the conditions of the formation of the institutional environment» (on the example of Sughd region of the Republic of Tajikistan)**

**Keywords:** territorial market, consumer goods market, role of the state, cluster analysis, ranking of regional entities, uneven development, consumer market regulation mechanism, institutional environment, effect of market institutions, development trend, physiological needs, saturation, progressive structure, import dependence, region, commodity resources, territorial distribution, market size.

**Relevance of the research topic.** At the present stage of socio-economic development of the Republic of Tajikistan and its regions, there are a number of problems related to the organization and effective functioning of territorial markets, which require their solution. Among them are issues of determining the isolation of territorial markets and their placement in the region, assessing the territorial structure of trade and the regularity of its development.

All this, as well as the need to study the features of the formation of territorial consumer markets in the current conditions of the institutional environment, the development of recommendations for improving the regulatory mechanism determines the relevance of the topic of research and determines the significance of dissertation work.

The object of research is the consumer markets of territories in the economic system of the region and their formation in a specific institutional environment.

The subject of the study is economic relations arising from the functioning of consumer markets located in the administrative territorial regions of the Sogd region in the context of the formation of an institutional environment.

The purpose of the dissertation work is to theoretically and methodologically substantiate the peculiarities and regularities of the functioning of territorial consumer markets in the context of the formation of an institutional environment and to develop specific proposals and practical recommendations aimed at increasing their effectiveness as an integral part of the economic system of the regions of the Republic of Tajikistan (for example, the Sogd region).

The innovative veness of novelty consists in the theoretical and methodological justification of the process of formation of the territorial consumer market and the identification of the peculiarities of its development, the development of scientific and practical recommendations for improving the organization of its functioning in a real institutional environment.
